COOL CAB AC

LAS VEGAS VALLEY

MAXIMUM STANDARD RESERVE

Ice Box

Our largest standard A/C battery for longer time away from an outlet.

AI concept rendering. Actual fit varies.

$8,995

STARTING INSTALLED
Before tax

Est. 8–13 hours with assist*

What's included

Cooling
OutEquip Summit 2, 12V, 10,000 BTU

Vehicle-assisted charging
20A with cart-specific reserve controls

Enclosure
Basic soft zipper enclosure

Dedicated power
314Ah Eco-Worthy EnergyTrek battery

Plug-in charger and controls
40A removable wall charger, monitor and timer

Extra battery option
Matched +314Ah from $1,795 installed

Model range on the reference cart*

Approx. 8–13 hours with vehicle assistance. Approx. 6.8–11.4 hours on the dedicated battery alone. The extra battery option increases the dedicated bank to 628Ah, subject to fit and payload.

*Modeled at 300–500W average A/C draw from a full dedicated battery with a 15% nominal driving-battery energy allowance on the reference cart. Runtime varies with heat, sun, enclosure and settings. Vehicle-assisted charging may reduce driving range.

Save $250 if your existing enclosure fits, seals and can be reused without enclosure work. Inspection required. Rooftop installation is standard. Rear-opening and other custom mounts are separately quoted.
