Vehicle assistance included
Approx. 5–9 hours modeled*

Ice Box

From $8,995

Installed before tax

314Ah dedicated battery
Vehicle assistance included
Approx. 8–13 hours modeled*

60-minute Short Trip pilot offer

If your fully charged A/C battery runs out before 60 minutes on the low cooling setting shown at pickup, with the enclosure closed, we install vehicle-assisted charging at no extra charge. Parts and labor included. Pilot carts must be approved for vehicle-assisted charging before installation.

Included on approved standard fits

Rooftop A/C, dedicated lithium battery, plug-in charger and a basic soft zipper enclosure. Existing windshield required.

Match your cart and your outings

Daily Driver +100Ah from $995. Ice Box +314Ah from $1,795. Mounting, capacity and final price are confirmed by fit check.

Save $250 if your existing enclosure fits, seals and can be reused without enclosure work. Inspection required. Rooftop installation is standard. Rear-opening and other custom mounts are separately quoted.

*Modeled at 300–500W average A/C draw from a full dedicated battery with a 15% nominal driving-battery energy allowance on the reference cart. Runtime varies with heat, sun, enclosure and settings. Vehicle-assisted charging may reduce driving range.
